The database is compiled from

- The historical databases 1989-2000 managed by WODC - Ministry of Justice of the Netherlands and Leiden University in the period 1991-2001.
- The historical databases 2001 - 2003 managed by UNICRI
- The individual databases from surveys done in 21 countries in the period 2002-2005, data management was done at INTERVICT with assistance of Marisca Brouwers from WODC - Ministry of Justice of the Netherlands and Sami Nevala.

Not included are

- The EU ICS data with 16 EU countries. These data are distributed by the EU ICS consortium lead by Gallup Europe. Please contact Gallup Europe to get access. www.europeansafetyobservatory.eu

Despite our best efforts, it is unavoidable that there are some errors and inconsistencies in the database. Please inform us if you find anything odd.

Disclaimer: anything that is published that contains ICVS data, is the responsibility of the author of that publication. We do not take responsibility for errors made by others in data analysis and presentation or for errors as a result of inconsistencies in the database.

The database is available to:

- Parties that have contributed to the database either with data, labour or funds.
- Academic institutes on request as from January 2008 for the purpose of secondary analysis.

John van Kesteren is the contact person regarding the data. vankest@uvt.nl

Some remarks

- Please do not distribute the database beyond your institute without our written consent.

CODEBOOK

Format of the database is SPSS, the file is called: ICVS2005_2.sav

The data in key-findings have been computed using:

-**national** data-

identification variable **I005b**, in combination with weighting variable **W005b**

-**main city** data-

Identification variable **I004a**, in combination with weighting variable **W004a**

These weighing variables are based on individual respondents, not every survey was provided with household weights, but these weights are added to the database in case they were available.

- On the CD are the SPSS syntax that were used to generate most of the tables and graphs in the latest key-report (van Dijk, van Kesteren, Smit, 2008).
- On the CD is a working paper version of the key report in PDF.

The codebook consist of three parts

1. Listing of the identification variables, years in which the surveys were done and the number of cases in the survey
2. Overview of the items plus the variable labels in the database and the corresponding question numbers in the basic ICVS questionnaires
3. The variable and value labels for each item
